- React | TypeScript | React Native | Next | JavaScript | HTML | CSS/SASS | Styled-Components | Tailwind | Redux | Git & GitHub & GitLab
- Frontend Web | Mobile | UX/UI | Design System | Storybook | CI/CD with Vercel | Accessibility | Scrum & Kanban | ClickUp | Trello

Experience

Junior Frontend Web & Mobile Developer　　　[Nano Incub](#)　　　*São Paulo, Brazil*　　**08/2022 - Current**

- Server-side rendered website and mobile app development using **React.js**, **React Native**, **TypeScript** and Styled-Components;
- Business platforms development and maintenance to serve more than 25,000 user employees from the biggest mills in the country;
- Implementation of UI Components - with **Atomic design methodology** - that can be packaged and consumed by larger applications;
- **REST-based API** design and consuming (Axios and fetch), managing large volumes of data, including integration with company's ERP;
- Translation **Figma** design into usable application components, in close collaboration with colleagues who work with UI/UX;
- Version control with **Git, GitFlow & GitHub** features, releases, pull requests, conflict solutions and code reviews;
- Agile Scrumban (**Scrum & Kanban**) methodologies, within sprints and using workflow boards such as ClickUp and Trello;
- Geographically dispersed and diverse team setting, with **startup culture** and proven track record of delivering frontend applications.

Mobile Developer (Freelancer)　　　[CFVY](#)　　　*Northampton, England, UK*　　**04/2022 - 07/2022**

- Mobile app development focused on user experience and clean design, with **React Native CLI, TypeScript** and Styled components;
- Software's user interface according to **Adobe XD** mockups following UX guidelines and Notion tasks;
- Highly collaborative cross-functional remote teamwork with flexible working times and proven track record of delivering;
- Feature branches, pull requests, conflict solutions, code reviews, debug issues and version control with Git & GitHub.

Junior Frontend Developer　　　[NB Consulting IT](#)　　　*São Paulo, Brazil*　　**01/2021 - 03/2022**

- Server-side rendered website and mobile app development with **React.js, Next.js, React Native**, Redux Toolkit and Styled-components;
- Distributed Agile **Scrum** remote team with flexible working hours, constant communication with product managers and designers;
- UI development according to Figma mockups following UX guidelines, development and management of reusable UI components;
- Version control with Git & GitHub. Continuous integration and continuous delivery **(CI/CD) using Vercel** workflow;
- Implementation of improvements in the management and distribution of tasks, reducing delays and increasing the volume of deliveries.

- Before becoming a developer, I worked for 5 years as a graphic designer in publishing houses and advertising agencies.

Projects

- **CAULE:** Mobile app for business used by employees to query payroll, receive institutional content, download documents, contact HR department and several other features. Application integrated in real time with company's Enterprise Resource Planning (ERP), built with React Native, TypeScript and Styled-components. Available for iOS and Android. Link to [landing page](#) **(08/2022 - 01/2023)**

- **COMIDA NA HORA:** Food ordering and food delivery app, operating in cities of Goias, Brazil. A restaurant marketplace as a showcase for local businesses, with tens of thousands of downloads. Built with React Native, TypeScript and Styled-components. Links to app stores: [iOS](#) and [Android](#) **(12/2022 - 01/2023)**
