Summary

- **Frontend Developer** with 3 years of experience building features for high-growth SaaS companies and IT services companies, working remotely with distributed teams, focused on **React** and **TypeScript**.

Experience

Frontend Developer	**SONDA / BNB** - *Fortaleza, Brazil*	**05/2023 - Present**

Via SONDA (Chile), currently working on Banco do Nordeste (Brazil), the largest regional development bank in Latin America.

- Created a **component library** with **Vite** using **React.js** and **TypeScript**, to be reused across various internal websites;
- Collaborated in the development of the **Design Systems**, bridged the gap between UX designers and developers;
- Worked with **Storybook** for documenting, presenting and testing UI components in isolation;
- Built new features, scalable, data-intensive pages, testing with **Jest** and helped with the maintenance of the Bank's websites;
- Developed a collaborative **documentation** platform with a static website generator (**Docusaurus**) with **React components**, resulting in an increase *of more than 50% in user engagement* compared to the previous version.

Frontend Developer	**Nano Incub** - *São Paulo, Brazil*	**08/2022 - 05/2023**

- Engineered and upheld a business platform serving *over 26,000 user employees* from the nation's leading mills*;*
- Developed more than 5 projects using **React.js**, **React Native**, **TypeScript** and Styled-Components, managing large volumes of data;
- Translated **Figma** design into UI Components with **Atomic design methodology**, that can be consumed by larger applications;
- **REST-based API** design and consuming (Axios and fetch), managing large volumes of data, including integration with the company's ERP.

Software Developer (Freelancer)	**CVFY** - *Northampton, England, UK*	**04/2022 - 08/2022**

- Contributed to the creation of a mobile app focused on user experience and clean design, with **React Native CLI** and **TypeScript**;
- Crafted a responsive **landing page**, strategically designed to convert new users to the platform, employing **React.js** and **TypeScript**;
- Realized software UI according to **Adobe XD** mockups, aligning with UX guidelines and Notion tasks;
- Executed **version control with Git & GitHub**, handling feature branches, pull requests, conflict resolutions, and code reviews.

Frontend Developer	**NB Consulting IT** - *São Paulo, Brazil*	**01/2021 - 03/2022**

- Developed server-side rendered websites and mobile applications with **React.js, Next.js**, and **React Native**;
- Collaborated on technical solutions across various projects, partnering closely with designers and clients to **enhance UI and overall UX**.
- Implemented improvements in task management and distribution, resulting in an increase of *over 50% in the volume of deliveries*;
- Developed and maintained **reusable components** in alignment with **UX guidelines from Figma** mockups;
- Conducted **code reviews for peers**, providing constructive feedback to further elevate project quality.

- Before becoming a developer, I worked for **5 years as a graphic designer**.

Projects

- **BNB REACT LIB:** React library developed as part of the Banco do Nordeste (BNB) Design System project with reusable components for several internal websites of the company, created with Vite, TypeScript, Jest, Rollup, Storybook and SASS. **(05/2023 - Present)**

- **CAULE:** Mobile app used by employees to query payroll, contact HR department and other features. Integrated with the company's Enterprise Resource Planning, built with React Native, TypeScript and Styled-components. Link to landing page **(08/2022 - 01/2023)**

- **SCOUTFY:** Sports management platform for amateurs to high-performance athletes, who can build a sports resume, apply for grants and sponsorships. Mobile first website, built with Next.js, Redux, Styled-Components and Storybook. Link to website **(07/2021 - 04/2022)**

- **COMIDA NA HORA:** Food delivery app. A restaurant marketplace as a showcase for local businesses, with tens of thousands of downloads. Built with React Native, TypeScript and Styled-components. Links to app stores: iOS and Android **(12/2022 - 01/2023)**

- **DEVMEETUP:** A social media platform for hosting and organizing gatherings and events for developer communities. This is a MERN study project (developed with MongoDB, Express, React.js and Node.js), with several stacks. Link to repository **(03/2023 - 04/2023)**
